PFC-XB is a cross-border freight solution that will get your parcel to its destination reliably and affordably. Many suppliers in the U.S. offer low cost or free shipping to customers inside the continental United States but often we see significantly higher rates charged for export shipments into Canada. To mitigate this discrepancy, simply instruct your supplier to ship your materials to our agent in Calais, Maine – just steps from the USA-Canada border – and PFC-XB will take care of the rest.

PFC-XB will handle movement across the border, expedition of customs clearance, transport throughout Canada, and final delivery to your door included in a competitive price.
